Full Stack Developer | React | Node.js | PostgreSQL | Angular | .NET | Docker | CI/CD | GitHub | AI / Agents | Agile Methodologies

Profile

Full Stack developer with over 4 years of experience in web development and enterprise application projects across manufacturing, food, and technology industries. Trained as a Full-Stack developer with strong knowledge of frontend, backend, and CI/CD. Skilled in version control and collaboration with Git and GitHub; programming in JavaScript, C#, Python, SQL, and .NET; frameworks and technologies such as React, Angular, Node.js, and PostgreSQL. Experience using AI (Claude Code) for software development, including building agents and managing prompts and skills. Skills in agile ticket management, participation in architecture decisions, problem-solving, cross-team collaboration, and technical communication.

Experience

Full Stack Developer, Fracttal Colombia S.A.S. – (November 2025 - September 2026)

Responsibilities:

- Managed a ticket-based agile workflow (Scrum/Kanban): fixed bugs reported in production and implemented new features from requirements prioritized on the team board.
- Contributed to defining and improving application architecture, evaluating design patterns and technical decisions with the team.
- Developed full stack applications using React on the frontend and Node.js on the backend.
- Designed, queried, and maintained relational databases in PostgreSQL.
- Implemented and managed continuous deployment (CI/CD) pipelines to ship new features.
- Managed version control and code collaboration through GitHub (pull requests, code reviews).
- Collaborated with cross-functional teams across the full product development cycle.
- Used Claude Code as the main AI tool for development, including building agents and automations for the team.
- Designed and managed custom prompts and skills for AI agents, tailoring them to project needs.

Achievements:

- Reduced turnaround time for resolving user-reported requirements and bugs, as well as for delivering new features.
- Improved the continuous deployment (CI/CD) process, automating stages of the development cycle to speed up releases.
- Automated repetitive development-cycle tasks using AI agents built with Claude Code, increasing team productivity.
- Contributed to defining a more scalable and maintainable architecture, making it easier to add new features without affecting existing modules.
- Participated in technical decisions that helped reduce the project's technical debt.
- Consistently delivered full stack features on schedule within each sprint.
- Built reusable React components that sped up the development of new screens and features.
- Optimized SQL queries in PostgreSQL, improving performance of the application's critical modules.
- Improved code quality through thorough code reviews, reducing errors before reaching production.
- Strengthened communication between product, design, and development teams, speeding up requirement definition and delivery.

Software Developer - Data Analyst, Carnicos y Alimentos Pollocoa – (February 2025 - September 2025)

Responsibilities:

- Built web applications with Angular and Node.js for internal processes and e-commerce.
- Administered and optimized databases in MySQL and MongoDB.
- Implemented DevOps practices with Docker deployments, reducing production errors.
- Produced reports and dashboards in Power BI for management.

Achievements:

- Reduced production errors by adopting automated deployments with Docker.
- Optimized MySQL and MongoDB database performance, improving application response times.
- Delivered Power BI reports and dashboards that supported management's decision-making.

Software Developer - Data Analyst, Industrias Metálicas Corsan – (December 2023 - June 2024)

Responsibilities:

- Implemented applications in .NET and SQL Server to automate administrative processes.
- Managed and maintained databases, optimizing data integrity and availability.
- Handled technical requests from users, resolving incidents with faster response times.

Achievements:

- Automated previously manual administrative processes, increasing the department's operational efficiency.
- Improved data integrity and availability through database optimization.
- Reduced resolution times for technical incidents reported by users.

Software Developer, Montacargas AM&M – (April 2022 - October 2022)

Responsibilities:

- Developed applications in C# and SQL for operational areas, improving inventory control.
- Administered databases, applying query improvements that reduced response times.
- Collaborated on technical documentation and support for key users.

Achievements:

- Improved inventory control by developing custom applications for operational areas.
- Reduced query response times through database optimization.

Rotating Operator - Analyst, CocaCola - Femsa – (October 2019 - April 2021)

Responsibilities:

- Managed and supervised various production processes.
- Controlled and analyzed quality and feasibility for product completion and distribution.

Achievements:

- Contributed to meeting quality standards across supervised production processes.
- Supported distribution efficiency through rigorous product viability control.

Education

Full-Stack Development – 2018 - 2020

HolbertonSchool – Medellín, Colombia

Software Developer (Certification) – 2020 - 2021

Coursera - Udemy

Skills & Knowledge

Programming Languages: JavaScript, C, C#, Python

Web Development: Frontend: Angular, React, HTML, CSS | Backend: Node.js, .NET

Databases: Relational: PostgreSQL, MySQL, SQL Server | Non-relational: MongoDB

Infrastructure & DevOps: Docker, CI/CD, Git, Linux

Version Control & Collaboration: Git, GitHub

Artificial Intelligence: Claude Code, AI agent building, prompt and skill design & management

Analytics & Reporting: Power BI

Methodologies: Scrum, Kanban

Soft Skills

Technical communication and documentation | Collaboration and teamwork | Problem-solving and critical thinking |
Time management and prioritization | Adaptability and continuous learning | Negotiation and conflict resolution

Languages

English – B2 | Spanish – Native
